Wed, Sep 2, 2015 at 12:14 PM

To: "Ginouves, Edward" <eginouve@blm.gov>

Cc: Paul Baker <paulbaker@utah.gov>

For the Milford ballast rock quarry, I think we would still go with what we recommended last year, which was to **add** a few species (crested wheatgrass and shadscale at rates of 2 PLS/acre), and to **remove** a few species from (galletta grass and blue bunch wheatgrass).

The following table is their approved NOI seed mix with the Division's recommendations from last year. Paul can respond if he has any additional input. This site ranges from about 5000' to 5700' in elevation.

Species	Seed Rate, Recommended 2015 (PLS/acre)	
Western Wheatgrass	1.5	
Crested Wheatgrass	2	
Indian Ricegrass	2	
Sandberg Bluegrass *	0.5	
Bottlebrush Squirreltail	0.5	
Lewis Flax *	0.5	
Yellow Sweetclover	0.5	
Palmer Penstamon *	0.5	
Scarlet globemallow *	0.5	
Wyoming Big Sagebrush *	0.2	
Winterfat **	1	
Ephedra	1	
Forage Kochia	0.25	
Fourwing Saltbush	2	
Shadscale	2	
Total	14.95	

* This seed will be broadcast in a common mix

** This species will not be mixed with other seed & broadcast over the area to be seeded.
